

# Helping a Top 5 Global Bank solve its business intelligence challenges

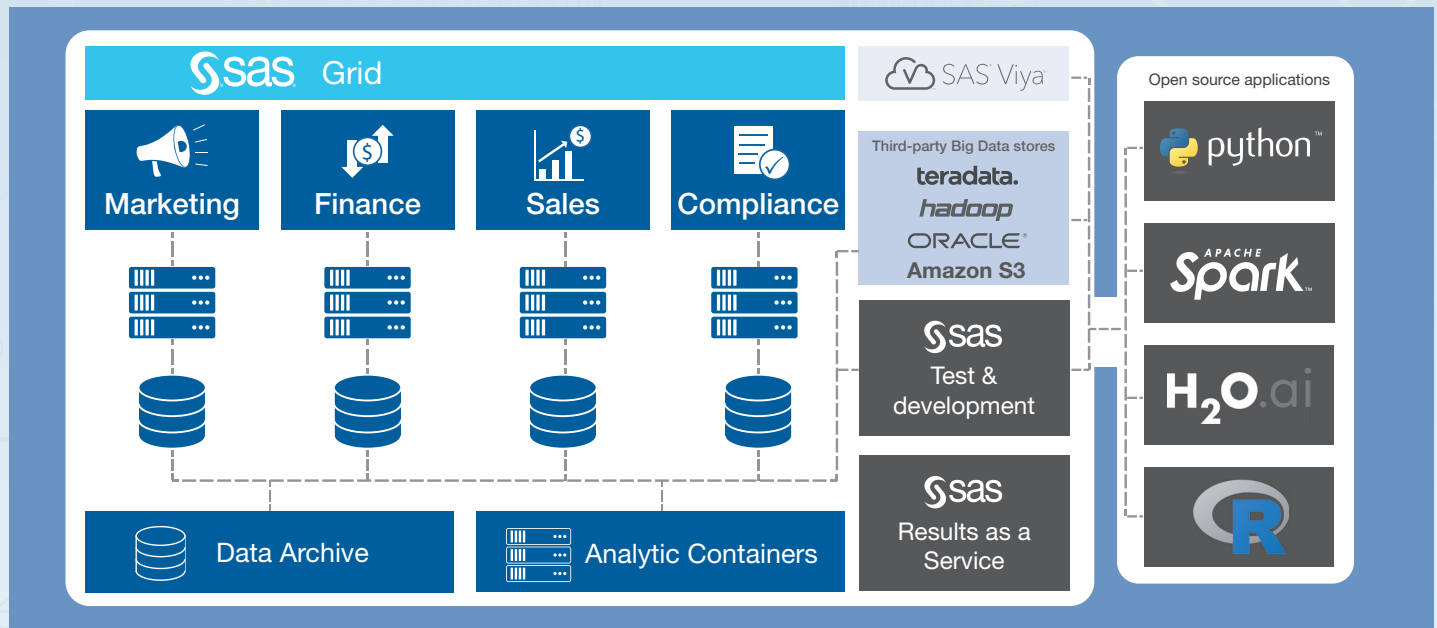

## THE CHALLENGE

The bank faced impending regulatory fines for outdated support on fragmented analytics environments and crippling technology performance from legacy infrastructure. In addition, the user experience was poor due to thinly stretched platform support and rising support costs and skills churn. The bank was looking for a total solution to address all their analytics issues.

## THE SOLUTION

- ❑ Deployed a rapidly available analytics appliance that consolidated the environments and simplified on-going management
- ❑ Implemented a compliance risk mitigation plan by having a fully supported and up-to-date environment
- ❑ Ensured the right skill set for support and enablement were made available under contract with a jointly agreed SLA
- ❑ Performance was revolutionized with a future-ready solution that scaled in line with the bank's own growth

## THE VALUE

- ❑ Reduced risk - returning \$100s of millions in capital back to the bank with improved regulatory performance and accuracy, thereby enhancing the bank's stability, strength and reputation
- ❑ Performance improvements of up to 500x across various analytics and data management application areas
- ❑ Improved collaboration between IT and LOBs is enhancing relationships and increasing organizational effectiveness
- ❑ Cost savings of \$10+ million and a TCO reduction of 60% YOY
